[DAY 4] MINI-PROJECT | Your First Automation

Sherin Mary P.J

PROJECT TITLE

Eat Me First – Smart Food Expiry Reminder Automation System

PROJECT DESCRIPTION

Eat Me First is a beginner-friendly automation project that helps users reduce food waste by tracking food expiry dates and sending automatic reminders before the food gets spoiled.

The system allows users to enter food details such as food name and expiry date through a simple input method (like Telegram). These details are automatically stored in a Google Sheet and processed using automation tools like Pabbly Connect.

Based on the expiry date, the system sends timely reminders to the user through Telegram so that the food can be used before it expires.

HOW IT WORKS (WORKFLOW)

1. User sends food details in Telegram bot

Example:

Milk | 30-05-2026

2. Telegram bot captures the message

3. Pabbly Connect receives the data

4. Data is stored in Google Sheets:

- Food Name
- Expiry Date
- Status

5. Automation checks expiry dates daily

6. If food is about to expire:

→ System sends alert to Telegram:

"⚠ Milk expires tomorrow. Please Eat Me First 🍎"

BENEFITS

- Reduces food waste at home
- Helps in better food management
- Easy reminder system for busy users
- Beginner-friendly automation project
- No manual tracking needed

- Can be used in homes, hostels, and restaurants
- Works fully automatically after setup

OUTCOME

After completing this project:

- Users get automatic food expiry alerts
- Food consumption becomes more efficient
- Waste is reduced significantly
- Learner understands real-world automation using Telegram + Pabbly + Google Sheets
- Student gains practical experience in workflow automation and integration tools
- Project can be expanded into a smart AI-based kitchen assistant in the future

Chat ID *

7824747035

Enter the Chat ID here. For example, if your channel ID is -155545555, then the chat ID will be -155545555 or the username of the target channel (in the format @channelusername or @supergroupusername). [Learn more](#)

Text Message *

🔔 Eat Me First Reminder

Milk expires soon 🥛

Please consume it today to reduce food waste 🍎

Enter or map the message text to send.

Message Thread ID

Enter Message Thread ID. Unique identifier for the target message thread (topic) of the forum. For forum supergroups only.

Reply To Message ID

If the message is a reply, Enter the ID of the original message.

Disable Notification

No

Choose if to send the message silently. iOS users will not receive a notification, Android users will receive notification with no sound. The default value is false.

Disable Web Page Preview

No

Choose to disable link previews for links in this message. Default value is false.

Allow Sending Without Reply

No

Pass True if the message should be sent even if the specified replied-to message is not found. The default value is false.

Protect Content

No

Protects the contents of the sent message from forwarding and saving. The default value is false.

Parse Mode *

HTML

Select [Markdown style](#) or HTML-style of the text, if you want Telegram apps to show bold, italic, fixed-width text or inline URLs in your bot's message.

Button Label(s)

Enter comma-separated label text on the button here. E.g. Button_1, Button_2, ...

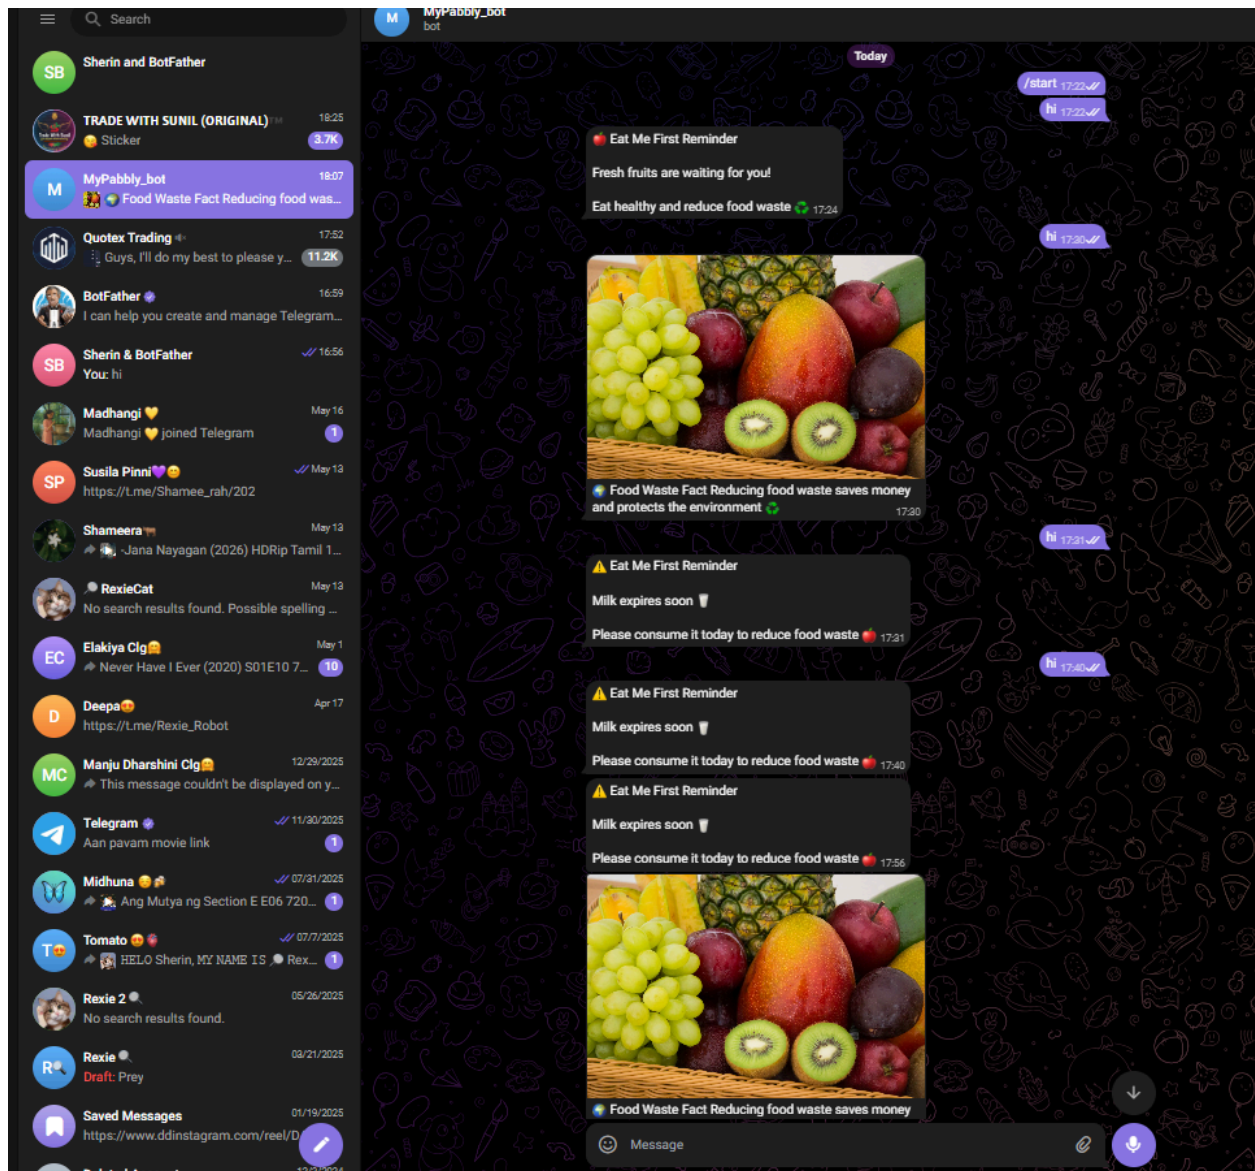

Button URL(s)

Enter the comma-separated URL of the button here. E.g. <https://www.google.com/search?q=serch+button+1>, <https://www.google.com/search?q=serch+button+2>, ...

Response Format:

☒ Simple

[STEP 6] Instructions for Sharing Your "Your First Automation" Loom

Congratulations on completing your "Your First Automation mini-project"! Sharing your work with our community is a powerful step toward turning them into reality. Here's how you can share your Loom:

SHARE YOUR AUTOMATION BY RECORDING A LOOM

Steps to Share Your Loom:

1. **Create a Free Loom Account:**
 - <https://www.loom.com/signup>
2. **Download & Install in your Computer:**
 - Be Resourceful
 - Ask Google, YouTube, ChatGPT
 - Figure it out.
3. **Test Before Recording Everything:**
 - Record a test Loom that is 10 seconds.
 - Check for Audio

- Check your Face
- Check if screen is recording properly

4. Less than 5 mins is more than enough:

- Tamil or English
- Just a Quick Intro about you.
 - i. Name
 - ii. Place
 - iii. What do you do?
- Demo your Basic Automation
- Demo your BONUS Automation

5. BONUS:

- With your Current Skills build a Cool Automation and showcase to Everyone

6. Share with the Group:

- Paste the link into our WhatsApp group chat to share your loom with fellow members.
