

SUCCESS SECRETS WITH ALEX

MAKE MONEY WITH AI CHALLENGE | தமிழ்

DAY 2 MINI-PROJECT | Your First Vibe Coding Experience Sherin Mary P.J

[STEP 1] YOUR IDEA (Based on The 10X Think Like a BUILDER Blueprint™):

"MedTrack+ – Smart Medicine Reminder & Health Tracker"

MedTrack+ is a smart web application that helps users:

- *track medicines*
- *manage expiry dates*
- *set daily reminders*
- *get voice alerts*
- *avoid missing doses*
- *improve health discipline*

*It works like a **personal digital health assistant in the browser.***

[STEP 2] YOUR IDEA EXPANSION (From the Questionnaire):

☒ What PROBLEM(S) does your IDEA Solve?

People forget to take medicines on time

- *Elderly people miss dosage schedules*
- *Medicines expire without tracking*
- *No proper reminder system for health care*
- *Confusion in medicine timing and duration*

- Lack of digital health organization

✓ What RESULT(S) can your IDEA Achieve?

Ensures timely medicine consumption

Prevents expired medicine usage

Improves health discipline

Reduces medical waste

Helps caregivers manage patients

Provides voice + notification reminders

✓ What VALUE(S) can your IDEA Generate?

Better healthcare awareness

Saves money and medicines

Real-world daily usefulness

Helps elderly and patients

Can be expanded into a startup product

Strong portfolio project for placements

[STEP 3] YOUR PROMPT (From the Questionnaire):

ACTION:

Act as the best JavaScript developer in the world and build a complete responsive web application using HTML, CSS, and JavaScript.

PURPOSE:

Create a Smart Medicine Reminder web app called “**MedTrack+**” that helps users manage medicines, expiry dates, dosage schedules, and voice reminders.

INPUT:

User will enter:

- Medicine Name
- Medicine Type (Tablet / Syrup / Capsule / Injection)
- Start Date (when medicine begins)
- Expiry Date (medicine validity end date)
- Daily Reminder Time (example: 7:00 PM)
- Course Duration (number of days prescribed by doctor)

OUTPUT:

System must display:

- Beautiful medicine cards UI (app-like design)
- Clear medicine details layout
- Start date and expiry date display
- Daily reminder time shown clearly

- Course duration tracking
- Days left before expiry calculation
- Status indicators:
 -  Safe
 -  Expiring Soon
 -  Expired
- Save data using localStorage
- Voice reminder using speechSynthesis API
- Browser notification alerts
- Responsive mobile-friendly UI
- Clean beginner-friendly code with comments

[STEP 4] YOUR CODE's SCREENSHOTS:

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<title>Before It Expires PRO</title>

<style>
body{
  font-family: Arial;
  background: #eef3f9;
  margin:0;
  padding:20px;
}

h1{
  text-align:center;
  color: #1e3a8a;
}
