

SUCCESS SECRETS WITH ALEX

Mini-Project: CSV to JSON converter

SHERIN MARY P.J

GOAL

- Use **Vibe Coding**
- Create a .CSV file with dummy data (5 Columns | 10 Rows)
 - Edit in Google Sheet → Download as .csv
- Upload to ChatGPT
- Ask it to write a Javascript Code to read from the file and convert the contents into JSON and print it in the console.
- Upload the file in replit.
- Run the Code written by ChatGPT
- See if JSON is displayed in the Output
- Modify the Google Sheet and download a new CSV file.
- Upload to Replit and see if new data is printed.

Javascript Code

```
const fs = require("fs");

const csv = fs.readFileSync("students.csv", "utf8");

const lines = csv.trim().split("\n");

const headers = lines[0].split(",");

const result = [];

for (let i = 1; i < lines.length; i++) {

    const values = lines[i].split(",");
```

```
let obj = {};  
  
for (let j = 0; j < headers.length; j++) {  
  
    obj[headers[j].trim()] = values[j].trim();  
  
}  
  
result.push(obj);  
  
}  
  
console.log(JSON.stringify(result, null, 2));
```

OUTPUT

Node.js v22.22.3

PS C:\Users\G FATHIMA\Downloads\AI SKILLS\CSV-To-JSON> node
index.js

```
